

Yusuf Ibrahim Kolade

Frontend & Full-Stack JavaScript Developer

ibrahim018.yi18@gmail.com · 07775 246648 · Middlesbrough, UK · [LinkedIn](#) · github.com/lbreex187

PROFESSIONAL SUMMARY

Frontend & Full-Stack JavaScript Developer with 2+ years of hands-on experience building responsive, user-centric web applications, currently studying for an MSc in Computer Science with Advanced Practice at Teesside University. Proficient in React, Next.js, TypeScript, Node.js and RESTful API development, with a track record of improving performance, reducing load times and shipping clean, maintainable, tested code. Equally comfortable owning the frontend experience and engineering secure backend services, from authentication and data modelling to transaction integrity and caching.

EXPERIENCE

Junior Full-Stack Developer

Sep 2025 – Present

Soft Quest Incorporated (SQI) · Lagos, Nigeria (Remote)

- Build full-stack applications using React (frontend) and Node.js/Express (backend), delivering complete feature sets end-to-end.
- Design and consume RESTful APIs to manage data flow between client and server layers.
- Reduced project bug count by 20% through systematic debugging, code reviews and peer mentoring sessions.
- Manage version control with Git and GitHub across collaborative team projects, enforcing branching and PR workflows.

Frontend Developer

Jan 2023 – Apr 2025

Oxford College, Ikeja · Lagos, Nigeria

- Designed and developed 20+ responsive web applications using HTML, CSS, JavaScript and React, ensuring cross-browser and cross-device compatibility.
- Built reusable React component libraries that improved UI consistency and cut development time by 25%.
- Integrated frontend apps with Node.js/Express backend services for efficient API communication and data handling.
- Optimised JavaScript execution and asset delivery, reducing average page load time by 30%.
- Applied SEO best practices across projects, improving search visibility and user engagement.
- Led usability testing sessions and translated feedback into UX improvements across multiple products.

PROJECTS

Tyread — Social Reading Platform

2026

tbookyread.vercel.app · [Next.js](#) · [TypeScript](#) · [Prisma](#) · [PostgreSQL](#) · [NextAuth](#) · [Tailwind CSS](#)

- Built a platform for readers and writers combining a searchable catalogue (Open Library, Project Gutenberg and admin picks), in-browser EPUB/PDF reading with saved progress, and personal reading shelves.
- Implemented chapter-by-chapter self-publishing in Markdown with sanitised rendering, plus book clubs with discussion threads and picks.
- Designed the data model as an ERD in DrawSQL before translating it into a Prisma schema; added NextAuth (credentials plus Google/GitHub OAuth) with role-based member and admin areas.
- Integrated UploadThing for file uploads and Resend for transactional email; validated input with Zod and tested with Vitest smoke, unit and integration suites.

Kols Investment — Stocks & Crypto Investment Demo

2026

kolskinv.vercel.app · [React](#) · [Redux Toolkit](#) · [Vite](#) · [Node.js](#) · [Express](#) · [MongoDB](#) · [Redis](#)

- Built a full-stack investment workspace with portfolio tracking, market search, buy/sell trading, analytics charts (Recharts), price alerts and multi-account management.
- Engineered an Express REST API with JWT access/refresh tokens, OTP email verification, session management, and admin approval workflows for deposits and withdrawals.
- Cached Alpha Vantage market data in Redis with graceful fallback; added rate limiting, request validation, allowlist CORS, CSV export and an OpenAPI specification.
- Tested the API with Jest and Supertest against an in-memory MongoDB; automated checks with GitHub Actions; deployed both apps to Vercel (API as a serverless function).

Zurickh Bank — Banking Demo

2025

[zurickh.vercel.app](#) · [React](#) · [Vite](#) · [Node.js](#) · [Express](#) · [MongoDB](#) · [JWT](#)

- Developed a full-stack banking application with account management, transfers, beneficiaries, savings and a simulated stock portfolio.
- Guaranteed transaction integrity using MongoDB multi-document transactions and a per-user ledger with journal history and account statements.
- Secured money movement with a 4-digit transaction PIN, tiered daily/monthly limits and recipient lookup; hardened the API with Helmet, rate limiting and validation.
- Wrote a Jest/Supertest test suite with an opt-in money-flow integration suite.

Restaurant Admin Dashboard

Jan 2026

[authentication-bf59e.web.app](#) · [Firebase](#) · [JavaScript](#) · [HTML](#) · [CSS](#)

- Real-time menu management dashboard using Firebase Authentication for secure admin access and Firestore for live data synchronisation.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend:	React, Next.js, Redux Toolkit, Vite, Tailwind CSS, Bootstrap, SEO
Backend:	Node.js, Express.js, RESTful API design, NextAuth, JWT authentication
Databases:	MongoDB (Mongoose), PostgreSQL (Prisma), Redis, Firebase / Firestore
Testing & Tools:	Jest, Vitest, Supertest, Git, GitHub, GitHub Actions, Vercel, VS Code
Concepts:	Responsive design, component architecture, accessibility, AI integration

EDUCATION

MSc Computer Science with Advanced Practice

Sep 2026 – Sep 2028

Teesside University · Middlesbrough, UK

BSc Computer Science

Jun 2020 – Sep 2024

Imo State University, Owerri · Nigeria

ACHIEVEMENTS

Internship Excellence Award — Oxford College, Ikeja

Dec 2023

Recognised for outstanding contributions to responsive web development and the successful delivery of scalable web solutions.
